

Genomics compute at a third of the AWS price.

EXAMPLE SAVINGS

RNA-seq

nf-ccloud Nextflow plugin · 8-sample parallel

\$16 vs \$45 on AWS HealthOmics

FASTQ → VCF

Sentieon license access · 21x whole genome

\$1.65 38 min, end-to-end

~70% cheaper

Across a range of hardware types — not only c8a.

Always dedicated

No noisy neighbors, no oversubscription. Repeatable benchmarks.

Local NVMe

Fast I/O on the box, plus CCloud network storage — both with zero egress fees.

HOURLY PRICE — C8A INSTANCE + NVME **YOU SAVE ~70%**

YOUR C8A INSTANCE	VCPU / RAM	AWS \$/HR	CAROLINA CLOUD \$/HR
c8a.4xlarge	16 vCPU / 32 GB	\$0.87	\$0.25
c8a.8xlarge	32 vCPU / 64 GB	\$1.74	\$0.49
c8a.24xlarge	96 vCPU / 192 GB	\$5.22	\$1.48
c8a.48xlarge	192 vCPU / 384 GB	\$10.43	\$2.96

vCPU, RAM and disk are sized independently — pick any combination, with larger configurations available than AWS's fixed instance ladder.

OBJECT STORAGE — SAME DATA, NO EGRESS TAX

AWS S3 Standard

+ ~\$90/TB egress

~\$23/TB·mo

Carolina Cloud

+ free egress

\$9/TB·mo

Bring your AWS workload — we'll help you benchmark.
